Hiring Manager

AEON Specialized Bank

Phnom Penh, Cambodia

Subject: Application for Backend Developer (Spring Boot) Position

Dear Hiring Manager,

I am writing to express my interest in the Backend Developer position at AEON Specialized Bank. As a fourth-year student majoring in Information Technology Engineering at the Royal University of Phnom Penh, I have developed a strong foundation in backend development, with hands-on experience in Java, Spring Boot, and RESTful API design.

Over the past year, I have worked on several projects that reflect my ability to build scalable and secure backend systems. I have experience developing microservices using Spring Boot, implementing JWT-based authentication, integrating with third-party APIs, and deploying applications on cloud platforms. Additionally, I have worked with MySQL and PostgreSQL for data management, and have knowledge of CI/CD tools like Jenkins for automated builds and deployments.

I am also familiar with tools such as Git, Docker, and Postman. My portfolio is available at <https://sunneng.me>, where you can view some of my recent work.

I am highly motivated to contribute to AEON Specialized Bank's mission of providing digital financial services with efficiency and security, and I am confident that my technical skills and passion for backend development make me a strong candidate for this role.

Thank you for considering my application. I would welcome the opportunity to further discuss how I can contribute to your development team.

Sincerely,

Sen Sunneng
